

Construction SAFETY FOR SUPERVISORS

Description:

Participants will learn the fundamentals for building a safe workplace that is appropriate for their construction company. The course assists in familiarizing participants with WorkSafe regulations and Certificate of Recognition audit requirements. The participants will also build practical skills for supervising construction worksites, conducting toolbox talks, providing health and safety training, conducting regular safety inspections, doing safety investigations where an accident occurs and designing a safety manual.

Audience:

The course is designed for construction owners, managers, estimators, supervisors and new safety representatives.

Course fee includes:

All books and materials, lunch, certificate upon completion and parking.

The course includes:

Two days (16 hours) of lessons with instructor plus an online portion involving research, reading and answering questions (7-8 hours).

Education credits:

The course is eligible for 5 CCA Gold Seal education credits upon completion.

The instructor:

Roger Regehr, *Cert. OHS*

Go to bgcpartners.ca/our-team for instructor bio.

At the end of the course participants will be able to:

- Define safety and determine responsibilities
- Understand the legislative requirements for maintaining a safe workplace
